My Net Worthwhile® is helping ensure clients' peace of mind by providing exceptional support, fostering trust, and addressing their needs with a commitment to excellence and personalized service.

Molly is passionate about helping clients navigate their financial journey with ease and simplicity. Her role involves handling client requests, focusing on client care and document preparation.

With a Bachelor of Science in Biochemistry from the University of Mississippi, Molly brings a scientific approach to her work — approaching each task as an investigator, constantly strategizing solutions to complex problems.

With a background in client services and operations, Molly loves diving into the details, especially when it makes things simpler and more efficient for everyone at the firm and for clients. Her main mantra is to “keep it simple” because she knows clients trust the team to do so.

Outside of work, Molly's passions range from glass artwork to painting to hiking and cooking. She loves psychological thriller movies and anything to do with dogs — she has two: Little Bill and Stella.
